Corporate clients in Japan

Why LINE WORKS is the right platform for PX MART

COMPANIES THAT SHOULD USE LINE WORKS

1

Deskless workforce

Most staff work without a PC

2

Already on LINE

Workforce uses personal LINE for work

3

Distributed multi-site operations

Many sites, fragmented communications

WHY PX MART FITS

~ 50%+ deskless at PX Mart

Part-time workers: approx. 12,117 people (*2024 ESG report*)

People already run on LINE

94% of Taiwan's population uses LINE

1,200+ stores nationwide

Plus 22 RT-Mart hypermarkets to integrate

COMPANY STRATEGY

01

“Supermarket for everyone”

Universal access & everyday value, the brand promise.

02

Win on fresh food

Fresh is the traffic driver and the margin battleground.

Recap: five candidates → three to build

The two-step methodology (Prof. Kim)

Step 1 · Critical × Complex filter
5 candidates

Step 2 · Four-dimension scoring
Strategic + Financial + Core +
Feasibility

Result · ranked build order
#1 Supply Contact (31)
#2 Scheduling (27)
#3 Pricing (25)

The five AI candidates

- | | | |
|----------|--|-----------------|
| 1 | Supply Contact Management
Seat-based identity; contacts survive turnover | BUILD #1 |
| 2 | Optimal Staff Scheduling
AI merges availability → Calendar | BUILD #2 |
| 3 | AI Discount Pricing
ML markdown on fresh food → task push | BUILD #3 |
| 4 | PX Mart Internal Chatbot
HyperCLOVA-X on SOPs / HR | Phase 2 |
| 5 | Sensor Shelf Monitoring
CV / sensor alerts → replenish task | Phase 2 |

Supply Contact Management

TODAY · personal LINE

9:41 Bob's LINE

Supplier - Ah-Ming (pork)

Delivering 30kg at 6am tmr

Thanks Ah-Ming 🍊

Price up 5% next month

Let me check

⚠️ Bob left the company
Supplier contact = gone

😞 Supplier Ah-Ming:
"who do I call now?"

LINE WORKS
rebuilds it

WITH LINE WORKS · HQ-owned seat

9:41 LINE WORKS

Store 042 · Assistant 1
now: Andy (was: Bob)

Delivering 30kg at 6am tmr

Thanks Ah-Ming 🍊

Price up 5% next month

Let me check

✎ Seat handover: Bob → Andy

Hi Ah-Ming, Andy here 🙋

Great, see u at 6am 🍊

😊 Supplier Ah-Ming:
"same number, same history"

The supplier chats with a role, not a person. Turnover stops being a security problem

Optimal Staff Scheduling

TODAY · manual scheduling

Week of Jun 10 — Store 042

Mon AM: Mei, Joe, ~~X~~Lin sick
Mon PM: ??? need cover
Tue AM: Joe, Sam, Mei
Tue PM: Lin? — texted no reply
Wed AM: Sam, Mei + 1?
Thu ... STILL WORKING ON IT
Fri ... XXX rewriting
Sat ... ???

3 hrs and
still not done!

LINE
WORKS
rebuilds it

WITH LINE WORKS · AI Calendar published

July 17 LINE WORKS Calendar · Store 042 · Week of Jun 10

	Mon	Tue	Wed	Thu	Fri	Sat	Sun
AM	Mei	Joe	Sam	Mei	Joe	Sam	Mei
PM	Joe	Lin	Mei	Sam	Lin	Mei	Joe
EVE	Sam	Mei	Joe	Lin	Sam	Joe	Lin

✓ AI-generated · 12 sec

Staff submit availability via survey → AI merges → schedule lands in everyone's Calendar.

SOLUTION #3

AI Discount Pricing

TODAY · stagnant markdown sticker

constant 60% or 80% discount
→ leaves margin on the floor OR shrinkage

➔
*LINE WORKS
rebuilds it*

WITH LINE WORKS · AI task pushed to floor staff

Predicts spoilage & demand by location → AI sends a one-tap price-change task to the floor.

Move PX Mart's operations into company-owned LINE WORKS, so its own data powers AI that runs the business

THE PROBLEM IT SOLVES

Knowledge on personal phones

Contacts, photos & schedules tied to one person.

Confusing handover

Every part-timer who leaves takes the data along.

Manual work

Scheduling burns hours; markdowns are not reliable.

WHY SOLVING IT IS A COMPETITIVE ADVANTAGE

Anyone can buy LINE WORKS. The edge is that PX Mart's AI runs on its **own data** and is built into daily work, so it can't be copied off the shelf. That delivers all three stated goals:

Win on fresh food

Pricing AI on PX Mart's own demand data cuts waste, keeps shelves fresh, protects margin.

“Supermarket for everyone”

Precise scheduling + preserved know-how = consistent service on every shift, every store.

Coordinate at scale

HQ-owned seats keep 1,200+ stores coordinated as the backbone for OMO growth.

0–6 MONTHS (Minimum viable deployment)

0–6 MONTHS

6–18 MONTHS

18+ MONTHS

Create the identity + governance layer — the foundation every later build inherits for free.

KEY MOVES THIS HORIZON

Provision HQ-owned role seats

Supplier rooms + permission rules, so each contact belongs to a job seat.

Pilot in 2 DCs + 20 stores

Start where supplier-contact is complicated

AI handover summaries

On any staff change, the new person inherits the full chat thread and a one-tap summary.

Close the personal-LINE gap

Business contacts and records leave private phones and become company assets.

WHAT WE CONFIGURE & PILOT FIRST

Set up the admin console, the job-role seat structure, and permissions. First test before going company-wide

FOCUS: BUILD #1 · Supply Contact Management

TRUST · Advance when pilot stores reach $\geq 90\%$ active seats and contact-loss incidents fall to near zero.

6–18 MONTHS — Scale conditions

Scale #1 nationwide and add the two AI builds that ride the identity layer.

KEY MOVES THIS HORIZON

- **Roll #1 to 300–500 stores**
Expand region by region — only after each clears the adoption thresholds.
- **Build #2 Scheduling goes live**
Staff submit availability via Form → AI merges the roster → Calendar publishes it.
- **Begin #3 Pricing pilot · 50 stores**
AI markdown tasks pushed to the floor in fresh-food stores.
- **Standardize issue codes**
Clean, comparable data across stores — the fuel the AI models need.

WHAT TRIGGERS FULL ROLLOUT

Metrics:

- $\geq 90\%$ active seats in pilot regions
- Schedule-build time under 20 min/store
- $\geq 85\%$ task-push action rate.

FOCUS:

Scale #1
Build #2 Scheduling
Start #3 Pricing

STANDARDIZATION · Each region scales independently the moment it clears these adoption thresholds.

18+ MONTHS — Compounding value

0–6 MONTHS

6–18 MONTHS

18+ MONTHS

The data and identity layers compound into an advantage rivals cannot simply buy.

KEY MOVES THIS HORIZON

Markdown model trained on PX Pay data

Predictions sharpen the longer it runs on PX Mart's own member demand data.

Supplier-reliability analytics

Accumulated interaction history scores suppliers automatically.

Reuse templates for 大全聯 / RT-Mart

New sites onboard in days, not months — the playbook is already built.

Identity + data moat

A competitor starting today is 18 months and millions of data points behind.

WHY IT BECOMES HARD TO COPY

The markdown AI learns from PX Mart's own PX Pay demand data and supplier-interaction history. The data compounds with every shift (it cannot be bought off the shelf)

FOCUS: Build #3 matures

LEARNING CURVE · The capability is now self-reinforcing: more use → more data → better AI → more use.

KPIs across the three builds

KPI	Build	Why it matters	Baseline	18-mo target	How we measure
Handover completeness	#1	Identity-layer adoption	0% today	100% of store + DC roles	LINE WORKS admin console (count of active seats)
Contact-loss incidents	#1	The core security gap	≈1 / exit *	Near zero	HR exits × orphaned-contact audit
Schedule build time	#2	Manager hours freed	~3 hr/wk *	< 20 min/store/wk	Form→Calendar timestamps
Fresh-food shrinkage	#3	Win-on-fresh-food margin	8–10% *	–15 to –20% relative	POS markdown + waste logs by store
Task-push action rate	#2,#3	AI actually reaches the floor	none today	≥ 85% acted within SLA	Accept / skip rate in-app

* working estimate — the **true baseline is captured in pilot week 1** before any improvement is claimed. Targets are goals benchmarked to LINE WORKS case studies and grocery-industry results

Success at 18 months = the identity layer fully adopted, the security gap closed, and the AI help fresh-food shrinkage down.

PX Mart's Organization Chart

Source: 全聯總部組織架構圖 — PX Mart HQ organization chart

#1 · Supplier contact

聯合採購部 + 物流部

- No changes required:
- Supplier relationships remain owned by procurement staff.
 - Existing approval processes remain unchanged.
 - Existing reporting lines remain unchanged.

#2 · Staff scheduling

營業部

- No changes required:
- Managers still approve schedules.
 - Employees still submit availability.
 - HR still manages labor compliance.

#3 · AI discount pricing

商品部

- No changes required:
- Pricing authority remains at HQ.
 - Store staff continue executing price changes.
 - Store managers continue supervising implementation.

Platform admin

資訊部

- Expand Existing IT Department Responsibilities:
- IT owns the LINE WORKS console, seats, & permissions; HR co-owns seat mapping.

RACI for all three builds — anchored to existing roles

	#1 Supply Contact				#2 Staff Scheduling				#3 Discount Pricing			
ACTIVITY	Vice-Chair	President	HR/IT Seat	Store Mgr	President	HR/IT Seat	Regional Mgr	Store Mgr	President	Categ. Mgr	IT Seat	Store/Floor
Config & integration	A	C	R	I	A	R	C	I	A	C	R	I
Data governance	A	C	R	I	A	R	C	I	A	R	C	I
Employee onboarding	I	A	C	R	I	C	A	R	I	A	C	R
Performance monitoring	I	A	R	C	I	C	A	R	I	A	C	R
Escalation handling	A	R	C	C	I	C	A	R	A	R	C	I

R

 Responsible

A

 Accountable

C

 Consulted

I

 Informed

The RACI as an organization chart

The store manager is the local R/A on the floor for all three builds.

AI KAIZEN

↪ new data feeds the next ideas — the cycle never stops

Bottom-up ideas, top-down permission

Sustaining the innovation cycle

Drive motivation

Store managers actively encourage ground workers to voice ideas freely.

Culture

Participation “a supermarket for everyone” starts inside.

Reward

Give great ideas reward and compensation

Things to be cautious about:

Idea block

Ground workers post, nothing visibly happens, the channel goes silent.

Fix: close the loop publicly. Every idea gets a status (testing / adopted / parked) in LINE WORKS, and adopted ideas name the associate.

Implementation bottleneck

If KAIZEN ideas accumulate faster than managers can review them, valuable suggestions get delayed or ignored, reducing trust in the process.

Fix: Assign a dedicated KAIZEN review team and require all ideas to be reviewed within a fixed timeframe

PX Mart in three years if KAIZEN works

Pricing discount that no competitor can match from train of demand data

Frontline ideas reaching HQ quickly to be evaluated

Fresh-food shrinkage structurally below rivals.

CONCLUSION

1 Sequenced, not ranked

#1 Supply Contact stays first as the foundation, then move to #2 and #3 projects. Consistent with the long term goals and KPI logic.

2 The AI is the destination

Fresh food Discount Pricing is the moat (highest financial impact) and address “win on fresh food” strategy. This can be compounds PX Pay data that rivals can't copy.

3 Minimal disruption

Requires minimal organizational change, making it easy for PX Mart to implement

4 KAIZEN makes it permanent

LINE WORKS turns frontline insight → tested change → SOP. Improvement becomes how PX Mart runs, not a one off deployment.
