KOIN Our solution!

Turn Allowance Into Financial Education

Business Overview - What we are building!

KOIN is a digital
fintech
education
platform
designed for
parents and
students

Oversee

- Real-time view
- Custom rules per child
- Breach alerts
- Family plan

Spend

- Real-time spending tracker
- Budget caps
- Controlled allowance

Learn

- Streaks
- Levels XP
- Badges
- Goal-based saving buckets

Vision & Mission

Our Vision

Become the leading youth financial learning platform that helps families build smarter money habits from a young age.

Our Mission

- Make budgeting simple and visual for students
- Help parents guide allowance without micromanaging
- Make financial literacy fun through gamified learning
- Encourage saving through goal-based savings
- Build long-term financial responsibility

VALUE PROPOSITION

KOIN turns allowance into financial education

A family financial learning app that connects spending control, savings goals, reports, and gamified learning.

PROBLEM

Students and parents need a better way to manage allowance.

1. Spending Without Awareness

2. Parents Lack Practical Tools

3. Budgeting Apps Feel Boring

4. Trend-Driven Impulse Spending

KOIN VALUE ENGINE

Four integrated tools make money habits easier to build.

1. Spending Limits

Set daily, weekly, monthly, and category budgets

2. Jar Savings

Save toward, visible personal goals

3. Financial Reports

See spending patterns and smart insights

4. Gamified Learning

Learn through quizzes, XP, streaks, and badges

OUTCOME

Families build smarter, healthier financial behavior.

Students spend smarter

Build consistent saving habits

Parents guide without micromanaging

Better financial habits from an early age

KOIN does not only help users track money.
KOIN helps families turn **daily allowance** into **long-term financial habits**.

Market Opportunity

Industry Overview

Indonesia's youth are online, spending - and financially unprepared

71.5 M
Gen Z in Indonesia

Ages 13-25, 87%
already online

50.70%

659.9T Value

15.47%
Fintech market CAGR

USD 2.63B (2024)
to USD 11.06B
(2033)

Market Size & Growth

A large, underpenetrated youth segment inside a high-growth fintech market

Financial literacy index by age group
— SNLIK 2024 (OJK/BPS)

Koin's Addressable Market

Market Trends

Payment Infrastructure (QRIS)

Users hit 58M by Q3 2025; merchants hit 41M — 92.5% of them MSMEs. QRIS is now processing value equal to ~5% of Indonesia's GDP. It is the payment layer every Indonesian youth already uses.

Youth Debt Crisis

OJK publicly warned in 2024 that Gen Z are most vulnerable to pinjol traps and investment fraud. 42% of Gen Z use online loans for daily needs (Jakpat 2024).

Parent Anxiety

No Indonesian product gives parents real-time, categorized visibility with financial education built in — this is a direct Koin parent dashboard opportunity.

Tiktok Content for Gen Z

No Indonesian product gives parents real-time, categorized visibility with financial education built in — this is a direct Koin parent dashboard opportunity.

Segmentation

Segment 1

Young learners

Age 7-12

Education-first

Parent-guided

Core audience for financial education habits. Parent help manage the account, child learns through guided content and simple tasks.

Segment 2

Teens & students

Age 13-19

Social spenders

Gamification-driven

High volume, viral acquisition. Strong motivation through streaks, rewards, and peer engagement.

Segment 3

Parents

Age 35-50

Highest willingness to pay

Trust-driven

Primary revenue. Joins to guide their children, stays for the oversight dashboard and family plan value.

Segment 4

Institution

Bulk licensing

Curriculum use

Long-term growth play with strong credibility upside. Pursue after the product is proven with individuals.

Later phase

Targeting

Segment 1

Young learners

Age 7-12

Education-first

Parent-guided

Acquisition
Willingness to pay
Retention lever
Strategic value

Core education audience. Builds habit from a young age — the earlier they start, the stronger the long-term retention.

Segment 2

Teens & students

Age 13–19

Social spenders

Gamification-driven

Acquisition
Willingness to pay
Retention lever
Strategic value

Growth engine. High volume and viral potential. Parents often follow their children onto the platform.

Segment 3

Parents

Age 35–50

Highest willingness to pay

Trust-driven

Acquisition
Willingness to pay
Retention lever
Strategic value

Primary payer. Joins because of their kids, stays because of the dashboard. Family plan is the key offer.

Positioning

For Indonesian youth and families who want to build money habits, our app is the first financial learning companion that combines a smart spending wallet with gamified financial education that grows with you.

BUSINESS MODEL CANVAS				
Key Partners	Key Activities	Value Proposition	Customer Relationships	Customer Segments
Financial - Local banking partners - E-wallet infrastructure Distribution - App Store & Google Play - Parent influencer networks Regulatory - OJK — fintech licensing - Bank Indonesia - Child data protection Growth - Financial & parenting influencers - Youth & community programs	- Product & app development - Gamification design & engagement optimization - User acquisition & retention - Partnerships - Security & compliance	For all users - Financial education + budgeting in one place - Users fully understand spending track Young learners & students - Real-time spending tracker with budget limits - Gamified saving streaks, levels & rewards - Financial education modules - Goal-based saving (gadgets, travel, etc.) Parents - Real-time child spending dashboard - Controlled allowance wallet with custom rules - Push alerts for budget breaches - Family plan covering multiple children	- Gamification: streaks, levels, badges - Parent dashboard with real-time view - Push alerts for budget & spending - Personalised budget & reward rules - Dedicated customer support - Lifecycle upsell: free → premium	Primary - Young learners · 7–12 - Teens & students · 13–19 => Love to learn and social spenders Secondary - Parents · 35-50 => Goal-oriented for financial education
	Key Resources		Channels	
	- Capital investment - Payment & wallet infrastructure - Reliable backend system - Anti-fraud & child data security - Financial education content library - Data analytics & personalisation - Brand & intellectual property		- Mobile app (iOS & Android) - TikTok & Instagram — teen acquisition - Financial & parenting influencers - WhatsApp — parent community reach	
Cost Structure			Revenue Streams	
Fixed costs - Development & engineering - Server & cloud infrastructure - Security & compliance - Education content production - Customer support & operations Variable costs - Payment processing fees - User acquisition & ads - Reward & incentive payouts - Partnership & revenue sharing - Marketing campaigns			Subscription — Free / Premium / Family - Free for limited access. Premium for full access. Family Plan paid by parents -> covers children's accounts. Top-up & transaction fee - Micro-fee per wallet top-up. Primary payers are parents topping up children's allowances. Advertising (free tier only) - Curated fintech, education & lifestyle. Education & B2B - Bulk school licensing in later phases.	

Competitive Analysis

Direct Competitors

Koin competes on two levels, direct competitors, apps targeting the same youth financial literacy space in Indonesia, and indirect competitors, solutions capturing similar user needs, time, and money

BluAccount for Teens

Background

Launched July 2024 by PT Bank Digital BCA, bluAccount for Teens is a digital banking account for users aged 12–17 who do not yet hold a national ID (e-KTP).

Strength

- Backed by BCA, Indonesia's most trusted and widely-used banks
- Access to real banking features
- Parental monitoring via notifications and the Haloblu system
- Full QRIS-compatible digital banking infrastructure

Tabungan SimPel

Background

Launched in 2015, SimPel is an OJK National Program focusing on savings and targeting students from Kindergarten to High School.

Strength

- Government-backed regulatory program
- No minimum deposit requirement (as low as Rp 1,000), no monthly administration fees
- Product offered by major Indonesian banks (BRI, BNI, BCA, Mandiri, BTN, and others)

Bank Jago

Background

Bank Jago is a digital bank backed by Gojek/GoTo and Ribbit Capital, with a strong reputation for multi-pocket savings management and a clean UX.

Strength

- Jago Money Quest (an interactive web-based financial education game)
- Jagoan Baca program shows a commitment to financial literacy beyond banking transactions
- Strong brand recognition and growing user base

Indirect Competitors

Tens of millions of users, built-in QRIS. But zero literacy features, no parental controls, no budgeting. They optimize for transaction volume — Koin converts spenders into planners.

E-Wallets (GoPay, OVO, DANA, ShopeePay)

Government credibility, national reach, free access. But web portals and offline seminars don't fit mobile-first youth habits. Koin can serve as the private-sector implementation layer.

OJK Programs (Sikapi Uangmu)

Polished XP-based products — but no QRIS, no Rupiah, no OJK compliance. USD pricing (\$5–\$15/mo) and Western cultural content make them non-starters in Indonesia.

Global Apps (Greenlight, Acorns Early)

Three fast-growing markets converge

Fintech

Digital wallets & QRIS payments — the rails & the behaviour.

EdTech

Digital learning platforms — the content & the habit.

Youth literacy

The unmet need + the OJK policy tailwind.

	QRIS	Gamification	Literacy Content	Parent controls	Teen-first
 Koin	✓	✓	✓	✓	✓
 Blu for Teens	Partial	✗	✗	Partial	✗
 SimPel	✗	✗	✗	✗	✗
 Bank Jago	✗	✗	Minimal	✗	✗
 Greenlight	✗	✓	✓	✓	Partial
 GoPay/ OVO	✓	✗	✗	✗	✗

Unique Selling Proposition

The only app that teaches
Indonesian teens to earn, budget,
and spend — all in one place.

65.43%

of Indonesians are financially
literate. Koin wil close the gap

Learn by Doing, Not Just Reading

Every QRIS payment a Koin user makes instantly updates their jar balances, triggers streak progress, and contributes XP. Real spending becomes real learning — no separate "study" mode needed.

One System That Builds Real Habits

Jar budgeting, XP levels, daily streaks, and a chore-to-earn engine work together as a single unified behavior loop — not separate features. Miss a day and your streak resets. Stay consistent and features unlock.

Two audiences. One Product.

A single reason to stay.

7

For Teens

Age 12-25

- It feels like a game, not a chore
- Real money, real results
- A mascot that represents me

For Parents

Adult Approvers

- Visibility without micromanagement
- Education baked into every Rupiah
- One plan, every child

Operations Plan

Operations Setup

Ideation

Define the core problem: users lack a **simple**, unified view of their finances.

Conduct **user interviews**, **map pain points**, and build the MVP feature list —

budgeting, expense tracking, savings goals. Produce wireframes and align on a monetisation model (**freemium vs. subscription**). This stage sets every downstream constraint.

Product Development

Build and maintain the **iOS + Android app**, core **budgeting engine**, **bank-sync integration**, and **analytics layer**. Team starts at ~4 engineers and scales +20%/yr as user base grows. Follows **2-week sprint cycles** with **monthly feature releases**. The app owns the user experience; the banking partner owns the regulated payment rails.

Compliance & Security

Fintech **licensing**, financial regulator **registration**, **user data protection**, and an **anti-fraud engine**. Budgeted from Day 1 — **non-negotiable** and a **trusted asset** with **users**. All data is encrypted end-to-end; the app passes annual third-party security audits. Compliance is what makes this a financial app, not just a calculator

Testing & QA

Closed beta with real users before public release. Covers **unit testing**, **UAT**, and **penetration testing**. Any bug touching financial data is resolved before launch — QA sign-off is required before the app proceeds to market

Market Launch

App Store + Play Store release with **digital marketing** and **referral campaigns**. In-app onboarding reduces drop-off; the FAQ bot handles routine support. Core KPIs — DAU, retention, and budget adoption rate — are reviewed weekly to guide growth

Operations Plan

User lifecycle workflow

ROADMAP & FUTURE GROWTH

0–6 MONTHS

Launch & validate

- Lock banking partner & OJK compliance
- Ship MVP: wallet + learning + dashboard
- First TikTok/IG acquisition push
- Instrument every metric

6–12 MONTHS

Prove the loops

- Validate teen-pulls-parent loop
- Reach ~27.5K monthly active users
- Hit annual-profit run-rate (Y2)
- Build out the content library

12–18 MONTHS

Scale & defend

- Push the +80% Year-2 download ramp
- Cross cumulative-cash positive (Y3)
- Launch B2B school licensing
- Deepen savings/goal products

Expansion & long-term growth

Products & Services

Home

Your financial dashboard at a glance — view your total balance, daily spending limit, monthly allowance progress, and quick-access actions like Top Up, Pay, Transfer, and Save to Jar.

Budget

Set and manage your spending boundaries with daily, weekly, and monthly caps. Get real-time alerts when you're approaching your limits so you always stay on track.

Jars

Save toward specific goals, one jar at a time. Create separate saving pockets for anything — a holiday trip, a new gadget, or whatever matters most — and watch your progress grow.

Learn

Level up your money skills through bite-sized lessons tailored to your spending habits. Earn XP, unlock achievements, and follow a structured learning path from Money Basics to advanced budgeting rules.

Report

Turn your spending into insights. See a full breakdown by category, track weekly patterns, compare budget vs. actual spending, and get smart tips to build better financial habits.

Profile

Your personal KOIN hub — track your level, XP, streak, and achievements, and manage your account settings including notifications, privacy, and parent-linking preferences.

Parent's view

Sales & Marketing Strategy

Pricing strategy

Tier	Price	For
Free	Rp0	Teens — tracker, basic modules, ad-supported
Koin Pro	Rp29,000/mo	Older teens — full gamification, ad-free
Koin Family	Rp49,000/mo	Parents — dashboard, multi-child, custom rules

Sales strategy

B2C: Parent-led conversion

Child discovers via TikTok → signs up free → invites parent → parent upgrades to Family Plan → The in-app parent invite flow is the #1 sales touchpoint

Referral as sales

"Invite a friend, both earn 500 XP" — turns the product into a growth channel

B2B: Institutional (Year 3+)

- Free pilot programs for 5–10 schools in Y1–2 to build social proof
- Align with OJK's financial literacy mandate for school buy-in

Marketing channels

Segment	Channel	Why
Teens (12–19)	TikTok, Instagram Reels	Where they discover everything
Parents (35–50)	WhatsApp, Instagram feed, parenting communities	Trust-driven, peer-recommended
Schools / B2B	LinkedIn, direct outreach, OJK co-branding	Credibility-first

Advertising & Promotion

Paid	Influencer	Content & PR
TikTok Ads: urban teens in Jakarta, Surabaya, Bandung, Yogyakarta	Student micro-influencers (10K–100K) for teen reach	"KOIN Financial IQ" series: short-form education content (organic + SEO)
Meta Ads: parents 35–50, targeting family & education keywords	1–2 parenting macro-influencers for Family Plan conversions	Monthly Savings Challenge tied to in-app gamification
Optimize for Rp15,000 blended CAC		OJK registration as PR milestone —> key trust signal for parents

Customer Acquisition

Teen funnel

Child discovers via social media → signs up free → invites parent → parent upgrades to Family Plan → Kids keep using and share with friends

Parent funnel

Parent discovers KOIN → signs up Family plan → brings teen on → gamification keeps teen engaged → parent keeps paying

Customer Acquisition

Retention as Acquisition

Monthly Financial IQ Score update

A personalized score (e.g. 0–100) that updates monthly based on modules completed, budgeting consistency, and savings behavior

Annual goal re-setting at account anniversary

On account anniversary, trigger a celebratory moment ("You've been on KOIN for 1 year!") with a summary of what they saved and learned

Family Plan renewal with child progress report

30 days before renewal, send parents a personalized report: modules completed, money saved, budget goals hit, Financial IQ improvement over the year

Financial Plan and Projections

Key assumptions driving the model

PRICING & MONETISATION

Koin Pro	Rp29,000 / month
Koin Family	Rp49,000 / month
Top-up fee	Rp1,000 × 3 / free user / month
Ad revenue	Rp3,500 / free user / month

GROWTH FUNNEL

Y1 downloads	50,000
Download growth	+80/60/40/30% (Y2–Y5)
Download → active	55%
Annual retention	70%

CONVERSION & COSTS

Free → Pro	6%
Free → Family	2.5%
Blended CAC	Rp15,000 / download
Corporate tax	22% (Indonesia)

- Reward rates: 3% p.a. (Pro) / 5% p.a. (Family) on deposits
- Payment processing 1.5%
- Partner rev-share 3%
- B2B school licensing Rp500M from Year 3.

Costs and first-year outlay

Cost item	Rp (M)
Development & engineering	864
User acquisition	750
Server & cloud	773
CapEx (hardware/software/IP)	500
Education content	480
Customer support & ops	360
Security & compliance (OJK)	300
Total Year-1 outlay	~4,027

CAPITAL TO COVER

- Rp1.3B

Cumulative cash position Year 1

Revenue forecast: Rp2.9B → 30.9B

TOTAL REVENUE & GROWTH

Y1	2.9B	—
Y2	7.4B	+150%
Y3	14.1B	+92%
Y4	21.9B	+55%
Y5	30.9B	+41%

~67% of Year-1 revenue is the free tier (ads + top-up fees). KOIN is ad/transaction-fee-led with a subscription growing later.

User growth & subscriber mix

Segment	Y1	Y2	Y3	Y4	Y5
Free users	25.2K	62.9K	116.5K	183.0K	260.0K
Koin Pro	1,650	4,125	7,640	12,000	17,049
Koin Family	688	1,719	3,183	5,000	7,104
Total paying	2,338	5,844	10,823	17,001	24,153
Paid conversion	8.5%	8.5%	8.5%	8.5%	8.5%

- ~70% annual retention compounds each cohort.
- Free users dominate volume
- Parents (Family) drive the highest revenue per user.

Cost structure & expense forecast

COST HIGHLIGHTS

~92% gross margin

Software economics — COGS is just processing, rewards & partner share.

UAC & engineering lead

The two biggest OpEx lines; both scale with growth.

Compliance

Security/OJK budgeted upfront as a trust asset.

OpEx grows slower than revenue

Total OpEx 3.5B → 12.7B while revenue 2.9B → 30.9B — operating leverage.

5-year P&L summary

Path to profitability & cash flow

Year 2

First profitable year

Year 3

Cumulative cash turns positive

(Rp1.28B)

Deepest cash point (end Y1)

~51%

Year-5 EBITDA margin

Scenario analysis — revenue at 80% / 100% / 120% of plan

Revenue

Cumulative Net Income (cash proxy)

Scenario	Y5 revenue	Y5 cash	Cash-positive	Trough
Optimistic (120%)	Rp37.1B	Rp35.2B	Year 2	(Rp0.7B)
Base (100%)	Rp30.9B	Rp23.1B	Year 3	(Rp1.3B)
Pessimistic (80%)	Rp24.7B	Rp10.8B	Year 4	(Rp2.2B)

WHAT THE TROUGH MEANS

The trough is the deepest your cumulative cash goes, the most you cover from your own funds before the business sustains itself.

Method: revenue flexed to 80% / 120%; all costs held at plan.

The background features a soft, abstract gradient. On the left side, there is a blend of warm orange and cool purple tones. This transitions into a clean, bright white area that occupies the center and right portions of the image. The overall effect is a modern, minimalist aesthetic.

Thank You!
